## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Sibley on April 26, 2005.

The application has been amended as follows:

Claim 1, line 1, replace "An antibody" with -- An isolated antibody --.

1. Claims 1, 4-12, 14-18, 58-63 are allowed.

The following is an examiner's statement of reasons for allowance: no prior art teaches or fairly suggests an antibody that specifically binds to a synthetic oligonucleotide (as illustrated in formula (1) recited in claim 1) having an organic protecting group covalently bound thereto, which antibody does not bind to said synthetic oligonucleotide when said organic protecting group is not covalently bound thereto. The closest prior art is the reference of Lewis et al. (US 5464759) where Lewis et al. teach an antibody against a terminal 5' capping group generated in a full length oligonucleotide whereas the antibody in the instant invention does not bind to the 5' capping group, rather the said antibody specifically bound to a synthetic oligonucleotide having an organic protecting group covalently bound thereto, which antibody does not bind to said synthetic oligonucleotide when said organic protecting group is not covalently bound thereto.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
